Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The applicant and examiner discussed the finer mathematical points between Alhswede and the instant invention. The applicant explained there is a difference between the symbols of the application and the bit rates of Alhswede. The examiner suggested applicant explain such "well known" meanings of the terms in the claims for clarity purposes, fix a 101 with the system claim, and explain how the representation vectors of the instant application are now the R values of the alhswede reference. The applicant conveyed the main difference is these representation vectors as they are defined in the spec but the examiner requires more explicit and clear meaning in the claim terminology. Applicant said he would be more explicit with the definition of full rank in the claim language which would not be more limiting in scope because it would be more clear in defining what such term means..
